

TESTIMONIALS: NOVA CROQUET & NOVA BOCCE

“Thought you would like to know that we intensely enjoy our diminutive gem of a practice croquet court. The sand-filled synthetic turf is perfect for the court’s location, terraced and nestled in the woods. Magically, the challenge and excitement of the court turns into a landscaped, serene setting to relax and socialize.”

John Goldfarb, CT

“The Bocce surface itself is phenomenal. The surface is aesthetically pleasing and the roll is straight and true. Everyone who steps on the court, from the first timer to the bocce veteran, is extremely impressed with it’s natural grass-like appearance. My staff and I researched this issue for six months before deciding on your surface and I would not hesitate highly recommending you and your product to anyone who was considering installing bocce courts in the future. In fact, I feel there is no other way to go.”

Clem Gigliotti Jr, Meri Contracting

“As you know, we received an Award of Excellence for the Beresford Bocce Complex. I also wanted you to know how well the courts are being received by the bocce players, even the skeptics. They are most especially pleased with the uniform ball reponse and the fact that the courts are playable almost immediately after a rain. Our maintenance staff is also pleased with the ease with which the courts can be maintained. I have given out a number of your cards to those interested.”

Richard Quadri, City of San Mateo
