

## TESTIMONIALS: NOVATURF RF

“Since the installation of our turf surface it has been used daily for a number of activities ranging from soccer to tennis and volleyball. It has proved to be very successful and with much pleasure I would recommend this type of turf to anyone who may be considering this type of usage.”

Cheryl Thompson, City of University City

“Our original surface was too hard, slippery when wet and a major factor in several injuries. The new (NovaTurf) material was installed and has been a major improvement both in regard to safety and our ability to allow a greater amount of activities to take place in the facility. Maintenance has been routine and easy to perform. The surface has withstood extensive usage and is in excellent condition several years after installation. This was the appropriate surface for our needs and I would recommend this material to any other potential buyers/users.”

Mary Ellen Alger, New England College
