ENGINEERED FOR SPORT

PRO[®] KRAMER

GREAT PACE FOR QUICKER SPEED.

A champion's choice for comfortable grass court play.

A cushion court surface that bears the name of its designer, former world champion Jack Kramer. ProKramer[®] is designed to provide balanced playing qualities throughout the entire court, with shorter, denser fibers for true grass-like ball response and excellent traction in a low-slide surface. It also provides highly visible lines due to the specialized sportline system for lining the court. ProKramer[®] has many refined properties, winning the hearts of players and owners alike. The surface is enjoyed by some of the finest tennis players, such as well known tennis teacher Vic Braden who stated, "The courts are a great surface for all players. It looks great, the ball bounce is good, and it's easier on players."

ProKramer[®] provides the soft feel and play of a grass court while allowing great traction and pace of play.

**World Class Traction • Grass-like Shot Response • Balanced Play Throughout Entire Court
Eco-Friendly • Visible Sportline System • Custom Colors • Two-Tone Construction**
