ENGINEERED FOR SPORT

PRO[®] CLAY

STRONGER. BETTER.

Looking for a real clay court, without the maintenance headaches?

ProClay[®] is an innovative surface developed for year-round play outdoors or indoor use.

ProClay[®] is a patented, natural playing surface constructed with the finest clay (blended fast dry) that is installed over a cushioned sub-structure (stabilized infill stratum base of synthetic resin and polyolefin). This unique technology and superior design allows for perfect clay court play winter, spring, summer and fall. Even in excess rainfall, this court will allow rain to drain away while the base retains the necessary reservoir of moisture. ProClay[®] is as excellent for new construction as it is for converting existing asphalt, concrete and fast dry courts.

It plays like clay because it is clay.

**Preferred Ownership • Preferred playability long warranty • Quick install
Low maintenance • Easy conversion of hard court • Year-round all-weather play**

X-Section

- ① Crushed Rock Base
- ② Dimensionally Stable Backing
- ③ Fibers, Infill & PolySeal Resin
- ④ Clay Sliding Layer
- ⑤ Clay Court Tapes
