ENGINEERED FOR SPORT

TITANTRAX[®]

Xtreme

STRONGER. BETTER. WORKS HARDER. GOES FARTHER.

TitanTrax Xtreme[®] is the ideal Cushion Court overlay for new and existing tennis courts.

Xtreme provides light weight installation indoor, outdoor, or on rooftops, covering minor cracks in existing surfaces.

This all-weather CushionCourt has the look and play of an American Hard Court without the normal stress on players' joints. Whether new construction over post tension concrete or installed over existing pavements you will still have a 25% force reduction allowing you to play longer. The innovative, proprietary design and engineering of NGI Courts provides long-term crack prevention, and adds years of life to any existing pavement.

Convert your hard court to Xtreme cushion comfort in less than half the time of adding cushioning with rubber.

Exclusive Warranty • Custom Colors • Quick & Easy Installation • Install over post-tension concrete or asphalt • Bio-mechanically Superior • Indoors/Outdoors/Rooftops
